

## Before Enhancement

We'll start with your original .jpg images. You'll send me your 12 photographs via a large file transfer website in a .zip file that I'll provide you. Don't worry I'll help you with the .zip file. It's easy.

## After Enhancement

I'll take your images through the same software I use when I produce a virtual tour minus the HDR phase. The result is what you see above. I'll then return your images to you via a large file transfer website and you can replace your old photographs in the MLS. Pretty simple, huh?
